

TAF Sequoia/New Sequoia Quick Start Guide

Thank you for purchasing a TAF Sequoia or a New Sequoia Atomizer! Both are fully customizable 25mm cannabis concentrate atomizer. Complete with both top and bottom airflow and a variety of coil options.

Sequoia Components

Using Your Sequoia

- ⇒ Set your mod to the proper settings for the coil you're using
- ⇒ Load a small amount of concentrate into your, near the center
- ⇒ Inhale while pressing and holding the fire button

Tips

- ⇒ Use a pulsing pattern when using wattage mode to prevent burning your product
- ⇒ Loading a small amount of concentrate will reduce reclaim
- ⇒ Store your Sequoia upright to prevent
- ⇒ Lubricate O-rings with a food-grade oil

Getting Started

- ⇒ Select a compatible sub-ohm capable 510 thread box mod
- ⇒ Ensure you know how to change the settings on your mod [temp, temp control, wattage]
- ⇒ Dry fire all new coils to burn off any residue

Setting Up

- ⇒ Screw the Sequoia clockwise onto your mod
- ⇒ Adjust the bottom airflow by rotating the ring around the base of the atomizer
- ⇒ Adjust the top airflow, or block it off if not using a bucket coil, by rotating the ring around the cap of the atomizer

Coil	Wattage	Temp Control	Temp (F)
Ceramic Donut	28-32	Ni	320-420
Triple Titanium w/ Quartz	28-32	Ti	350-450
Triple Titanium w/ Black Ceramic	28-32	Ti	350-450
